# Key Insights

## Top Category

Clothing leads all categories with **\$104,264** in total sales.

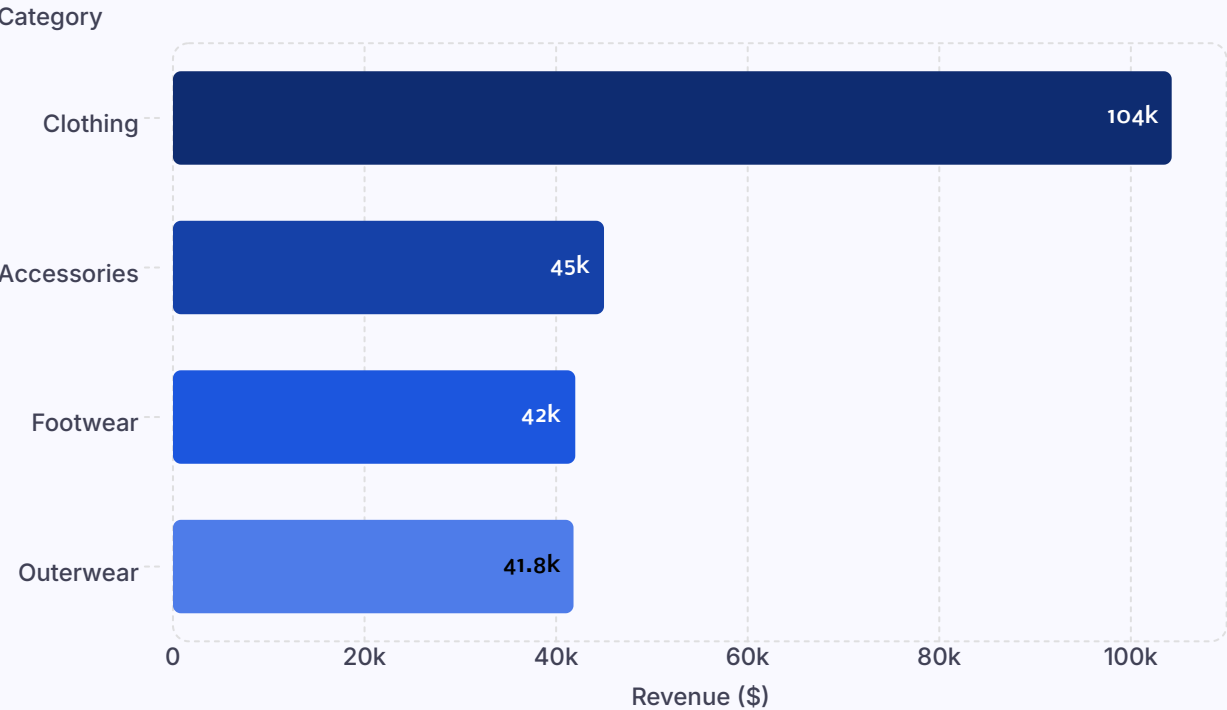

## Gender Split

Male customers contributed **\$157,890** vs. female customers at **\$75,191**.

## Peak Season

Fall drives the highest seasonal revenue at **\$60,018**.

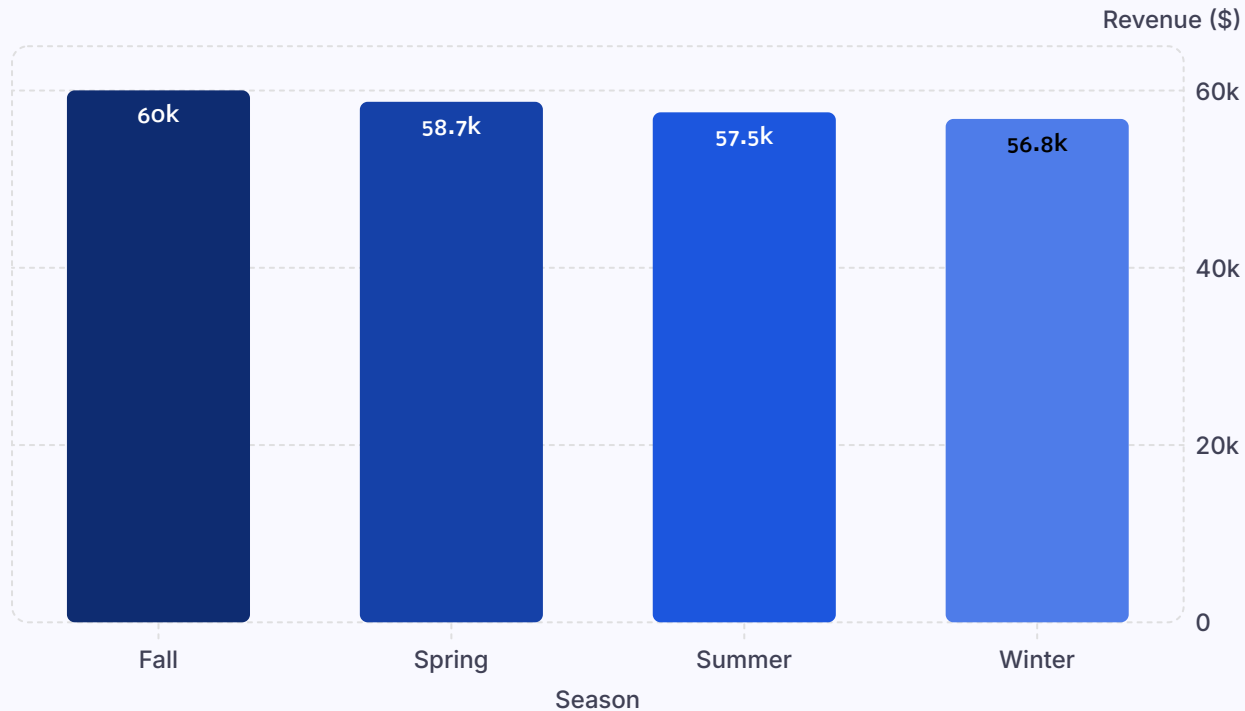

# Revenue by Category

## Clothing Dominates

Clothing accounts for nearly **45%** of total revenue at \$104,264 – far outpacing all other categories. Accessories, Footwear, and Outerwear follow with relatively balanced contributions.

# Season-wise Revenue Analysis

## Fall Leads, All Seasons Competitive

Fall generates the highest revenue at **\$60,018**, closely followed by Spring. Seasonal distribution is relatively even, suggesting consistent year-round demand with a slight autumn peak.

# Gender Revenue Breakdown

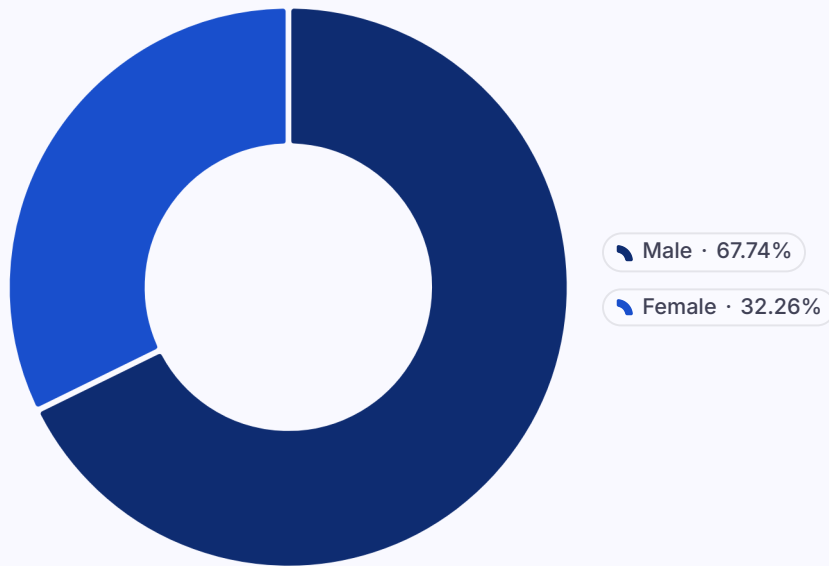

## Male Customers

**\$157,890** – 68% of total revenue

## Female Customers

**\$75,191** – 32% of total revenue

# Revenue Share by Gender

## Male-Dominated Spend

Male customers account for roughly **two-thirds** of total revenue. This gap highlights an opportunity to develop targeted campaigns and personalized offers to better engage female shoppers and grow their share of wallet.

# Seasonal Opportunity Map

Revenue is distributed fairly evenly across seasons, with Fall and Spring presenting the strongest promotional windows.

# Strategic Recommendations

## → Seasonal Promotions

Double down on Fall and Spring campaigns to capitalize on peak purchasing activity.

## → Personalized Offers

Use demographic data to tailor offers – especially to increase female customer engagement.

## → Clothing-First Strategy

Prioritize inventory and marketing investment in Clothing, the clear revenue leader.

# Conclusion

Customer spending is highest in **Clothing**, with strong activity during **Fall and Spring**. Focused seasonal promotions, personalized offers, and targeted marketing can meaningfully improve customer engagement and revenue growth.
